ASSESSMENT

Cardiovascular Chronic Clinic Assessment

Complications/End Organ Damage

Left Ventricular Hypertrophy, Coronary Heart Disease, Cerebrovascular Disease, Peripheral Vascular Disease, Hyperlipidemia, Renal Insufficiency, Congestive Heart Failure

Plan

Educate disease process and other self-management education.

Life style modification.

Chronic Care Visit Schedule: Initial then by disease response classification.

Cardiovascular Assessment at each visit.

Weight, BMI, and multiple Blood Pressure assessments on each visit.

Pharmacological management as indicated by patient response on each visit.

CBC, Complete Metabolic Panel, Fasting Lipids, Urinalysis, TSH, ECG and Chest X-ray initially.

CBC, BMP, Fasting Lipids, Urinalysis, and other labs as indicated by response category and guidelines.

Hyperlipidemia assessment initially and treat to target LDL levels by guidelines.

Fundoscopy eye exam on each visit.

Manage congestive heart failure to achieve NYHA functional Class I or II.

Annual Flu Vaccine. Pneumonia Vaccine as indicated by guidelines.

Hypertension

Assessment:

1. HTN

Degree of Control:

GOOD: < 140 / < 90 Diabetics <130 / < 80 continue current pharmacological therapy, reinforce life style modification and weight loss. Monthly BP monitoring and Chronic Care Visit every three months times two then every four months.

Refusal of Treatment

To Whom It May Concern:

I, Aric Johnson, MDOC #: 101119

Herewith confirm that I refused the medical attention and/or treatment designated. I further state that I am aware that the treatment and/or service I decline was recommended by duly authorized MDOC/Contracted Medical Vendor personnel. I understand that in refusing to keep the appointment made for me or allow treatment to proceed, that another appointment will not be made for me with regards to this complaint.

I have been made aware of any and all consequences to my health that may occur up to and including death as a result of this refusal.

Medical Service Refused:

CC WTN

Remarks:

I did not fill out a sick call

but does not recall what medication or whe.

Past social: single, has a 24 year old daughter, working in logging for >15 years, long term smoker 30ppy, admits to using ICE about two weeks ago

- Suicidal ideations (denies auditory or visual hallucinations)
- Hypertension
- Prediabetes with (HgA1c of 5.8 in 1/2020)
- Long term smoker

Overall Plan -admit for short stay for suicidal ideations

-he is on suicide precautions although his complaints sound more like security issues however he is not discussing particular matters

-Draw labs, he has a history of anemia from unknown source and is prediabetic.

Mental Health Crisis Treatment Plan - Suicide Watch

Today's date: 05/12/2020

Primary MH Psych MD or NP: Evelyn Dunn, PMHNP-BC

Primary MHP: May Leflore, Ph.D., LPC, NCC

Problem List:

DJD, SPINE (ICD-721.90) (ICD10-M47.9)

Hx of ANTISOCIAL PERSONALITY DISORDER (AXIS II)

HYPERTENSION (ICD-401.1) (ICD10-I10)

Current Meds:

LISINAPRIL-HYDROCHLOROTHIAZIDE 20-25 MG ORAL TABLET (LISINAPRIL-HYDROCHLOROTHIAZIDE)
one tab by mouth qday

AMLODIPINE BESYLATE 10 MG ORAL TABLET (AMLODIPINE BESYLATE) one tab by mouth qday

NORTRIPTYLINE HCL 25 MG CAPS (NORTRIPTYLINE HCL) take 1 tab by mouth at bedtime DOT; Route:
ORAL

VITAMINS A & D OINT (VITAMINS A & D) apply to the affected area once a day 5 packs month; Route:
EXTERNAL

COLACE 100 MG ORAL CAPSULE (DOCUSATE SODIUM) take one cap by mouth daily; Route: ORAL

IBUPROFEN 400 MG ORAL TABLET (IBUPROFEN) take one tab by mouth tid with food; Route: ORAL

THERAPEUTIC 0.5 % EXTERNAL SHAMPOO (COAL TAR EXTRACT) Wash hair 3 times per week; may refill 1;
Route: EXTERNAL

Precipitating Events: During interview with patient, patient stated, "My life is in danger. They are going to kill me. I'm going to hang myself. I told my lawyer that I was going to kill myself. They moved all the old guys to D Building". Patient did not respond to why they wanted to kill him.

Signs of Risk: Verbal threaten of suicide, and had a plan. Security Issues in the housing unit

Patient Strategies to Reduce Risks: Alleviate the suicidal impulses and ideations and return to highest level of previous daily functioning.

Identify and express feelings and thoughts that trigger suicidal thoughts during each session

Identify and express strengths that will help maintain positive outlook while incarcerated over the next 30 days

Staff Interventions: Evaluate inmate for the need for medication and prescribe medication as appropriate will risks and benefits fully explained.

Assist in identification of reasons for continuing to choose to live or reasons to choose not to kill self.

Follow-Up

Condition on Discharge: Improved

Brief HPI: Mr. Riley is a 42 y/o male with PMHx of HTN and osteoarthritis who presents to infirmery for complaints of suicidal ideation. He states he has been having these thoughts for over a week. He states he was planning on using a sheet to hang himself. He denies any family stressors but states that his relationships with others in the zone is poor. He states he had a period in the past in which he was on medications for depression but does not recall what medication or whe.

He was admitted to infirmery and placed on suicide precautions. He was seen by mental health. Mr. Riley continued to make statements about wanting to kill himself because people were going to hurt him in his zone. He neglected to tell behavioral health or medical staff exactly what the issue was on the zone and why he was fearful for his safety. He denied other symptoms of depression including sleep disturbances or appetite changes. He was

05/16/2020 - Mental Health: Psychiatric Visit

Provider: Evelyn Dunn PMHNP-BC

Location of Care: Mississippi State Penitentiary

Psych visit type Other

Subjective:

SUBJECTIVE / Chief Complaint: Mr. Riley, a 42 y/o AAM, is seen for f/u to discharge of suicide observation. He was on suicide observation May 11, 2020 and discharged May 12, 2020. Review of records, he reported suicidal thoughts with plans to hang self. There are vague reports that he has problems with peers on the zone, peers trying to kill him. Records also indicate he reported recently used drugs, to include ICE a few weeks prior. He is mildly elevated at interview; however, pleasant/cooperative. He describes recent admission to suicide observation as, "was at 42, was going to kill myself" - this comment with a smile/playful. He shifts to he is tryin to leave MSP and transfer closer to home. Reports he is trying to get back to Meridian. Reports he has been in x18 years and has x30 years left. He is a LOC A - no indications for a mental health transfer. He is now medium custody. Longstanding hx on long-term - his upgrade to medium custody is a milestone. He is offered positive feedback to this progress. He is encouraged to continue to work to improve behaviors. Primary hx consistent with ASPD issues. If he exhibited mood/thought dsiturbances recently that contributed to his reported sx's that resulted in admission to suicide observation - highly likely related to his substance use. No mood/thought disturbances presented at interview. No reported issues with peers. Discussed daily activities, reports he is trying to get moved to Unit 28 to allow for a job.

Objective:

Current medications

LISINOPRIL-HYDROCHLOROTHIAZIDE 20-25 MG ORAL TABLET (LISINOPRIL-HYDROCHLOROTHIAZIDE)
